

Can I solve problems involving money, using the four operations?

1. It was a warm summer day. I bought five McFlurry ice creams and two cones with a flake and a strawberry sundae for my family.
How much did I spend overall?
2. I bought two large chicken selects 5 pieces meal with 4 extra dips. How much did I pay?
3. I went to the shop and bought a large spicy veggie wrap, two medium Big Mac meals and four hamburgers. How much did I spend?
4. I bought a medium grilled chicken salad meal, three fruit bags and a bottle of water. How much did I spend overall? What was my change from £10?
5. If you had £10.00, what would you buy? How much change would you have?
