

To solve missing number problems using inverse operations

1. $37 + \square + 23 = 100$

2. $81 + \square = 213$

3. $315 = \square + 114$

4. $\square - 105 = 312$

5. $418 - \square = 213$

6. $38 + \square + 7 = 120$

7. $\square + 120 + 123 = 376$

8. $32 + \square + 15 = 555$

9. $\square - 105 = 93$
