

Hello Year 5!

As you are all at home for a while longer, the Year 5 teachers have been selecting activities from our Curriculum for you to crack on with at your leisure. Most of what we should be studying is included with some extra ideas to be used as this moves on. I have included a brief summary of the topics we will be studying so you can get an idea of expectations etc.

Please feel free to let your teachers know of any issues via Class Dojo or send us photos of your hard work as we would love to see it!

As always, we are available for any further guidance or support and will help as best as we can.

Hope you are all safe and well!

Mr Burnham & the Year 5 Team

SUMMER TERM – TOPIC OUTLINE

Maths

Revision of key operations & application in word problems including co-ordinates. Remember X goes across and Y to the sky!

Literacy

Instructional writing, producing your own set of instructions.

Planning, producing and sharing your own story orally.

The Highwayman – exploring the poem and responding in different ways.

Computing

Producing your own interview with a survivor of the Titanic shipwreck. Draft, edit and publish your script and even film it for added bonus points!

Science

Life cycles of mammals, changes in babies.

Geography

Identifying mountains and locating famous examples from around the world. Understanding how mountains are formed, using key vocabulary for definitions.
