

18/11/20

Can I give fractions the same denominator?

Change both the fractions so they have the same denominator:

1) $1/3$ $2/6 =$ $/12$ 6) $5/6$ $3/12 =$ $/24$

2) $3/5$ $1/10 =$ $/20$ 7) $3/9$ $6/18 =$ $/18$

3) $2/8$ $4/16 =$ $/16$ 8) $3/5$ $5/15 =$ $/30$

4) $1/4$ $3/12 =$ $/12$ 9) $4/6$ $7/12 =$ $/12$

5) $1/6$ $2/18 =$ $/18$ 10) $6/7$ $8/14 =$ $/28$
