

I am learning to estimate, measure and compare mass.

Item	How much do you think it will weigh? (grams or kilograms)	How much did it actually weigh? (grams or kilograms)
		
		
		
		
		
		
		

1. Can you sort the items from lightest to heaviest?
2. Which items were heavier than the school book?
3. Which items were lighter than the mug?
4. What is heavier, 3 school books or a dictionary?
