

# Can I measure friction?

## Aim (What do I want to find out?)

To investigate how different materials create different amounts of friction on a smooth shiny surface.

## Method (How am I going to do it?)

---

---

---

---

---

## Prediction (What do I think will happen?)

---

---

---

---

---

---

## Results

<u>Object</u>	<u>Time 1</u>	<u>Time 2</u>	<u>Average</u>

## Conclusion (What happened and why?)

---

---

---

---

---
