

Week 6 Science – The digestive system.

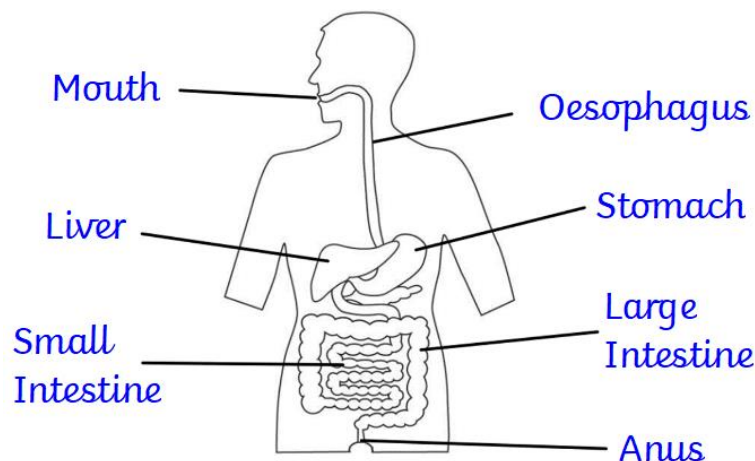

This week we will be looking at how the digestive system works.

Start with watching the video on this website called 'food's incredible journey':

<https://www.stem.org.uk/resources/elibrary/resource/36133/digestive-system>

Help the children to note down any key info in the digestion process.

Next, children to label the diagram of the human digestive system. (Answers here)

Finally, can children write a short paragraph about how the digestive system works? Can they describe the journey food takes? What is its purpose?

Good luck!
