

Home learning Dinosaur day instruction!!

Firstly, it would be amazing to find out what you already know and would like to know about dinosaurs.

There is a great video that you can also watch as an introduction. Feel free to add to what you would like to find out throughout the day!

After this, use the information sheets to find out more about different types of dinosaurs and create your own set of Top Trumps cards. These can be added to your class set when back in school so hold on to them!

Use this website to find out more or feel free to do your own research!

<https://www.bbc.co.uk/cbeebies/curations/dinosaur-facts>

Next we will look at how dinosaurs travelled and left footprints. Can you piece together the puzzle and come up with a theory of what might have happened?

To go along with this, can you make your own dinosaur footprints. Can you create a story using a toy dinosaur and play doh/plastercine/blu tac?

Finally we come to how the dinosaurs became extinct. Using the videos and information, can you design a persuasive poster telling us how YOU think the dinosaurs became extinct?

Have a roar-some day!
