

Why learn about area?

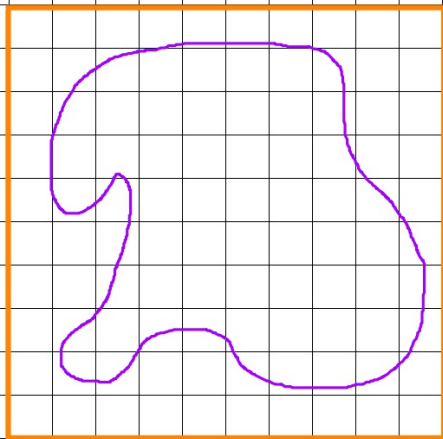

**If you wanted to lay carpet
you'd need to calculate the area
of your rooms/hallway.**

**The Egyptians used area to help them build
the pyramids of Giza.**

**How could they have used it to help them build
the pyramids?**

P.T.O.

Can I estimate the area of irregular shapes?

What might the area of this shape be?

Is there a method you could use before guessing?
