

Lesson 6 and 7

Caves, arches and stacks.

Your aim is to understand that one formation cannot occur without the previous one being eroded away. You will do this by explaining how each of these formations is created and the stages from one formation to another.

These are your resources.

A PowerPoint. Go through it to help your understanding.

A mix and match picture sheet. Can you explain how a cave, stack and arches are formed?

A key word sheet.
